

# ZHENG ZHANG

E-Mail: zhangzheng199203@gmail.com ◇ Tel: (412)-576-8347

Address: 2 Bayard Rd Apt 47 Pittsburgh, PA 15213

## EDUCATION

---

**Carnegie Mellon University, Pittsburgh, PA**

Sep 2015 - Dec 2016(expected)

Carnegie Institute of Technology, GPA: 3.67/4.00

**Tianjin University, Tianjin, China**

Sep 2011 - Jul 2015

School of Science, GPA: 3.64/4.00

## SKILLS

---

<b>Programming</b>	Proficient : Python, Java, HTML, CSS, JavaScript, BootStrap, jQuery, MySQL, Jekyll Familiar : C/C++, Git, Django, AJAX, AngularJS, AWS, Azure, EMR, Big Data
<b>Software</b>	Adobe PhotoShop, Adobe Illustrator

## COURSEWORK

---

**Carnegie Mellon University**

Cloud Computing; Client-Side Web Technologies; Data Structures for Application Programmers;  
Introduction to Machine Learning(current); Fundamentals of Programming

## PROJECTS

---

<b>Travel Route Social Website</b>	Mar 2016 - Apr 2016
------------------------------------	---------------------

- Designed, created and deployed a travel sharing web app based on Django MVC and SQLite database.
- Created the layout and elements of all the polished web pages using Bootstrap and jQuery framework.

<b>Twitter User Data Analysis</b>	Mar 2016 - Apr 2016
-----------------------------------	---------------------

- Designed and created a cloud-based web application providing query services on a 1-TB-sized Twitter dataset.
- Designed and optimized MySQL and HBase database schemas for the back-end part of this web service.
- ETL the dataset using Amazon EMR based on Hadoop Streaming into the databases.

<b>Contact Management Application</b>	Mar 2016
---------------------------------------	----------

- Created a contact management app with local storage to JSON file based on AngularJS.
- Implemented Google Maps API with AngularJS to show the location of that contact.

<b>Cloud Storage System</b>	Mar 2016
-----------------------------	----------

- Implemented the back-end of a cloud storage system providing storage and query of key-value pairs located on multiple areas.
- Applied replication and sharding strategies with MySQL and HBase databases for the cloud storage system.

<b>Wikipedia Big Data Analysis</b>	Jan 2016
------------------------------------	----------

- Analyzed a wikipedia JSON big data set with both bash language and python.
- Obtained the required properties of the big data set by managing Amazon EMR.
